

Operational Health and Safety, Quality and Environmental Policy

Silverstone Green Energy provide electrical services to the renewable energy sector.

Silverstone Green Energy are committed to providing safe and healthy working conditions for all employees, protecting the environment, preventing pollution and promoting biodiversity and delivering consistently high-quality services to our customers. We actively encourage continued professional development at all levels, with both the cost of training and the time required being at the company's expense.

Silverstone Green Energy are committed to preventing ill-health, eliminating hazards and minimising operational health and safety risks. We consult with all employees on Health and Safety matters and encourage a positive culture where everyone is free and comfortable to engage in constructive and active participation with Health, Safety and Environmental concerns and recommendations and we emphasise the importance of calm and considered working.

Silverstone Green Energy are committed to achieving full compliance with our legislative and other obligations, and to developing and demonstrating industry best practice. We engage with industry leaders and professional bodies to ensure that we are fully conversant with all requirements and recommendations and undertake to implement these within our policies, processes and objectives and communicate this clearly throughout the company.

Silverstone Green Energy are committed to making continual improvements to enhance Health and Safety, Environmental and Quality management performance.
